Mathematical Biosciences

an international journal

Volume 124

M. ALTMANN (Minneapolis, Minnesota) AND M. MORRIS (New York, New York)
A Clarification of the ϕ Mixing Model 1
DAVID GREENHALGH (Glasgow, Scotland) AND KLAUS DIETZ (Tübingen, Germany)
Some Bounds on Estimates for Reproductive Ratios Derived from the Age-Specific Force of Infection 9
VLADIMIR ROUDERFER AND NIELS G. BECKER (Bundoora, Australia), AND HERBERT W. HETHCOTE (Iowa City, Iowa)
Waning Immunity and Its Effects on Vaccination Schedules 59
LINDA J. S. ALLEN (Lubbock, Texas)
Some Discrete-Time *SI*, *SIR*, and *SIS* Epidemic Models 83
NIELS G. BECKER AND QUANXI SHAO (Bundoora, Australia)
A Transmission Model for a Disease with Some Fatalities 107
BOOK REVIEW
RICHARD GOMULKIEWICZ (Lawrence, Kansas)
Life History Invariants: Some Explorations of Symmetry in Evolutionary Ecology (Eric L. Charnov) 123
PAUL D. DALE, PHILIP K. MAINI (Oxford, United Kingdom), AND JONATHAN A. SHERRATT (Coventry, United Kingdom)
Mathematical Modeling of Corneal Epithelial Wound Healing 127
J. V. WHITE (Reading, Massachusetts), I. MUCHNIK, AND T. F. SMITH (Boston, Massachusetts)
Modeling Protein Cores with Markov Random Fields 149
MIRJAM KRETZSCHMAR, JOHANNES C. JAGER (Bilthoven, The Netherlands), DICK P. REINKING, GERTJAN VAN ZESSEN, AND HENK BROUWERS (Utrecht, The Netherlands)
The Basic Reproduction Ratio R_0 for a Sexually Transmitted Disease in a Pair Formation Model with Two Types of Pairs 181
JOHN C. WITT (St. Louis, Missouri)
Multichannel Evoked Potentials as Voltage Space Trajectories 207
MINI KALIVIANAKIS, SIPKO L. J. MOUS, AND JOHAN GRASMAN (Wageningen, The Netherlands)
Reconstruction of the Seasonally Varying Contact Rate for Measles 225

Elsevier

Book Reviews
George I. Bell (Los Alamos, New Mexico)
Receptors: Models for Binding, Trafficking and Signaling
(Douglas A. Lauffenburger and Jennifer J. Linderman) 235
Sean J. Barry and Marc Mangel (Davis, California)
Kinetic Theory of Living Pattern (Lionel Harrison) 237
